

## Citrix Training Schedule

This course provides the foundation necessary to effectively deploy and administer Citrix Presentation Server 4.5 and XenApp 5.0 for Windows Server 2003 and its components, including Load Manager, Installation Manager, Web Interface, Application Streaming and Secure Gateway.

Learners will receive hands-on training on installing and using the various administrative consoles to configure published resources, policies, individual server and server farm settings, load evaluators, isolation environments, printers, streaming applications, and much more.

### CTX-1259BI - Citrix Presentation Server 4.5 and XenApp 5.0 for Windows Server 2003: Administration

#### Certification Preparation

Citrix instructor-led training course CTX-1259BI prepares for exam 1Y0-259 Citrix Presentation Server 4.5 and XenApp 5.0: Administration. Exam 1Y0-259 is required for certification as a Citrix Certified Administrator (CCA) for XenApp 5 on Windows Server 2003.

#### Audience

This course is intended for IT professionals, such as server, network, systems and helpdesk administrators familiar with Microsoft® Windows® environments. Systems engineers, analysts, consultants, and architects are also appropriate candidates for this course.

#### Preparatory Recommendations

It is recommended that learners have experience administrating Microsoft Windows Server™ 2003 environments.

#### Scope

5-days of instructor-led training. This course provides classroom lecture and practical application through demonstrations, practices, and hands-on exercises.

#### Key Skills

Upon successful completion of this course, learners will be able to:

- » Install XenApp in a Windows Server 2003 environment
- » Install and configure Clients
- » Publish application, resources and content
- » Configure and manage policies
- » Configure ICA connection and session settings
- » Configure load evaluators and monitor load using Load Manager
- » Deploy applications using Installation Manager
- » Deploy applications into an isolation environment
- » Configure and manage network and session printing
- » Install and configure Web Interface
- » Configure streaming profiles, install the Streaming Client and configure XenApp to stream applications
- » Secure access to published resources through ICA encryption, Citrix SSL Relay and Secure Gateway
- » Upgrade a Presentation Server 4.5 environment to XenApp 5.0 for Windows Server 2003
- » Upgrade and configure the Streaming Profiler
- » Upgrade and configure the Presentation Server Client to XenApp Plugin for Hosted Apps
- » Upgrade and configure the Streaming Client to XenApp Plugin for Streamed Apps
- » Configure the Client Detection Wizard in Web Interface
